SUMMARY

Electronics and Telecommunication Engineering graduate with hands-on experience in Embedded Systems, Embedded C, and microcontroller programming using PIC18F4580, LPC2148, STM32F407, ESP32, and Arduino. Completed internships at Emertxe Information Technologies and Omegasoft Technologies, gaining practical experience in firmware development, sensor interfacing, PCB design, and hardware-software integration. Proficient in communication protocols including UART, SPI, I²C, CAN, and MQTT, with knowledge of RTOS concepts. Passionate about developing reliable embedded solutions and seeking an opportunity as an Embedded Software Engineer or Firmware Engineer.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Telecommunication Engineering – 8.14 CGPA

Jai Hind College of Engineering, Kuran, Pune

2026

Higher Secondary Certificate (HSC) – 72.83%

Maharashtra State Board of Higher Secondary Education

2022

Secondary School Certificate (SSC) – 86%

Maharashtra State Board of Secondary Education

2020

INTERNSHIPS & TRAINING

Embedded Systems Intern – Emertxe Information Technologies, Bangalore

Dec 2025 – Jan 2026

- Completed structured training in Embedded Systems Programming covering Embedded C and microcontroller fundamentals
- Participated in regular quizzes, evaluations, and hands-on hardware-software exercises
- Developed embedded applications relevant to Embedded Systems, Electronics, and IoT domains

Embedded Systems / IoT Intern – Omegasoft Technologies, Pune

Jan 2026 – Jun 2026

- Received hands-on training in Embedded Systems and IoT fundamentals with Arduino and ESP microcontrollers
- Interfaced multiple sensors and implemented hardware-software integration using Embedded C
- Built mini projects related to IoT and embedded applications

PROJECTS

Smart Helmet for Accident Detection and Safety (B.E. Project)

Aug 2025 – May 2026

- Developed an **ESP32-based smart helmet** for accident detection and rider safety.
- Integrated **IR Sensor, GPS, GSM, and MQ-3 sensors** for collision detection and real-time emergency alerts.
- Implemented **Embedded C firmware** for sensor interfacing, data processing, and automated SOS notification.

TECHNICAL SKILLS

Languages: C, C++, Python, Embedded C

Microcontrollers: Arduino, PIC18F4580, LPC2148 (ARM7), STM32F407G (ARM Cortex-M4), ESP8266

Communication Protocols: UART, SPI, I²C, CAN, MQTT, Wi-Fi, Serial Communication

Embedded Systems: GPIO, PWM, ADC, Timers, Interrupts, RTOS, Device Drivers, Firmware Development

Tools: STM32CubeIDE, MPLAB X IDE, Keil µVision, Arduino IDE, Visual Studio Code, Proteus Simulation

Hardware & Electronics: Sensor Interfacing, Circuit Design, PCB Design, PCB Quality Inspection, Circuit Testing, Digital Multimeter, Troubleshooting

Other Skills: Project Management, Problem Solving, Troubleshooting, Team Collaboration, Analytical Thinking, Time Management
